Falconbridge Terminates South Voisey Bay Property Option

Calgary, April 15th 2004 – Northern Abitibi has been advised by Donner Minerals and Falconbridge Limited that Falconbridge has Terminated its Option And Joint Venture Agreement with Northern Abitibi. Although work performed to date on the project would have allowed for Falconbridge to maintain its rights under the Option until December 31, 2004, Falconbridge has waived that right and has terminated the Option effective immediately.

Work performed by Falconbridge Limited on the Northern Abitibi Property since the beginning of the Option period on September 6th 2001 has consisted predominantly of airborne and ground geophysical surveys and one short drill hole located some 1.6 Kilometers away from previously identified high grade nickel-copper-cobalt bearing massive sulphides on the Property.

Northern Abitibi continues to believe that the project has the potential to host a major nickel-copper massive sulphide deposit. Together with Donner Minerals, the Company will continue to investigate various means to move the South Voisey Bay Property forward.
