## **First Pass Drilling Complete at Silver Park, Nevada and Corporate Reorganization**

Northern Abitibi Mining Corp. ("Northern Abitibi") is pleased to announce that an 8 hole (922 meter) reverse circulation drill program has been completed at its Silver Park Property, Nevada under the supervision of Dr. Shane Ebert, P.Geol.

The drill program was designed to test for both high-grade silver/gold veins as well as lower-grade bulk tonnage disseminated precious metal targets. Based on criteria defined by geology and alteration as noted in surface mapping and sampling, the Company feels that the drill holes have successfully tested and intersected their intended targets. In addition, drill hole number 6 has intersected a new zone of blind carbonate-hosted silicification located east of the known historical workings.

Samples from the drill program have been sent to ALS Chemex in Elko Nevada for preparation and analyses. Assay results are expected in approximately four to six weeks and will be released as they become available.

Corporately, the Company has also received and accepted notice from Mr. James Devonshire of his intention to retire from the Company both as a Director and as President effective December 31, 2005. Dr. Shane Ebert, P.Geol., currently a director of the Company will replace Mr. Devonshire as President. Northern Abitibi would like to thank Mr. Devonshire for his past services and contributions to the Company and wish him well.

The Qualified Person responsible for the design and implementation of the Nevada Silver Park Field Program as well as the preparation of this news release was Dr. Shane Ebert, P.Geol. now the President of the Company.

"Jean Pierre Jutras"  
Jean Pierre Jutras  
Vice-President Exploration/Director
